NOTE TO EQUIPMENT OWNER:

Please read this Owner's Information Manual carefully before installing and using this appliance and keep this manual for future reference.

For your convenience, please record the model and serial numbers of your new equipment in the spaces provided. This information, along with the installation data and dealer contact information, will be helpful should your system require maintenance or service.

A NOTE ABOUT SAFETY

Any time you see this symbol  in manuals, instructions and on the unit, be aware of the potential for personal injury. **There are 3 levels of precaution:**

1. **DANGER** identifies the most serious hazards which will result in severe personal injury or death.
2. **WARNING** signifies hazards that could result in personal injury or death.
3. **CAUTION** is used to identify unsafe practices which could result in minor personal injury or product and property damage.

NOTE is used to highlight suggestions which will result in enhanced installation, reliability, or operation.

 **WARNING**

PERSONAL INJURY, DEATH AND / OR PROPERTY DAMAGE HAZARD

Failure to follow this warning could result in personal injury, death or property damage.

Improper installation, adjustment, alteration, service, maintenance, or use can cause explosion, fire, electrical shock, or other conditions which may cause personal injury or property damage. Consult a qualified installer, service agency, or your distributor or branch for information or assistance. The qualified installer or service agency must use factory-authorized kits or accessories when modifying this product.

Read and follow all instructions and warnings, including labels shipped with or attached to unit before operating your new air conditioner.

GENERAL

The high wall fan coil unit provides quiet, maximum comfort. In addition to cooling and/or heating, the high wall fan coil unit matched with an outdoor condensing unit filters and dehumidifies the air in the room to provide maximum comfort.

IMPORTANT: The high wall fan coil unit should be installed by authorized personnel only; using approved tubing and accessories. If technical assistance, service or repair is needed, contact the installer. The high wall fan coil unit can be set up and operated from the remote control (provided). **If the remote is misplaced, the system can be operated from the “Auto” setting on the unit.**

Operating Modes

The high wall fan coil unit has five operating modes:

- **FAN Only**
- **AUTO**
- **HEATING (heat pumps only)**
- **COOLING**
- **DEHUMIDIFICATION (DRY)**

FAN Only

In the **FAN Only** mode, the system filters and circulates the room air without changing room air temperature.

AUTO

In the **AUTO** mode, the system automatically cools or heats the room according to the user-selected set point.

NOTE: **AUTO** mode is recommended for use on single zone applications **ONLY**. Using **AUTO CHANGEOVER** on multi-zone applications could set an indoor unit to **STANDBY** mode, indicated with two dashes (--) on the display, which will turn off the indoor unit until all the indoor units are in the same mode (**COOLING** or **HEATING**). **HEATING** is the system's priority mode. Simultaneous **HEATING** and **COOLING** is not allowed.

HEATING

In the **HEATING** mode, the system heats and filters the room air.

COOLING

In the **COOLING** mode, the system cools, dries and filters the room air.

DEHUMIDIFICATION (DRY)

In the **DEHUMIDIFICATION** mode, the system dries, filters and slightly cools the room air temperature. This mode prioritizes air dehumidification but it does not take the place of a dehumidifier.

Wireless Remote Control

The remote control transmits commands to set up and operate the system. The control has a window display panel that displays the current system status. The control can be secured to a surface when used with the mounting bracket provided.

Wired Remote Control (Optional)

PARTS LIST

Table 1 — Parts List

PART NO.	PART NAME
1	Air outlet
2	Air inlet
3	Air filter
4	Electric Control Cabinet
5	Wired Controller
6	Drain Pipe
7	Wireless Remote

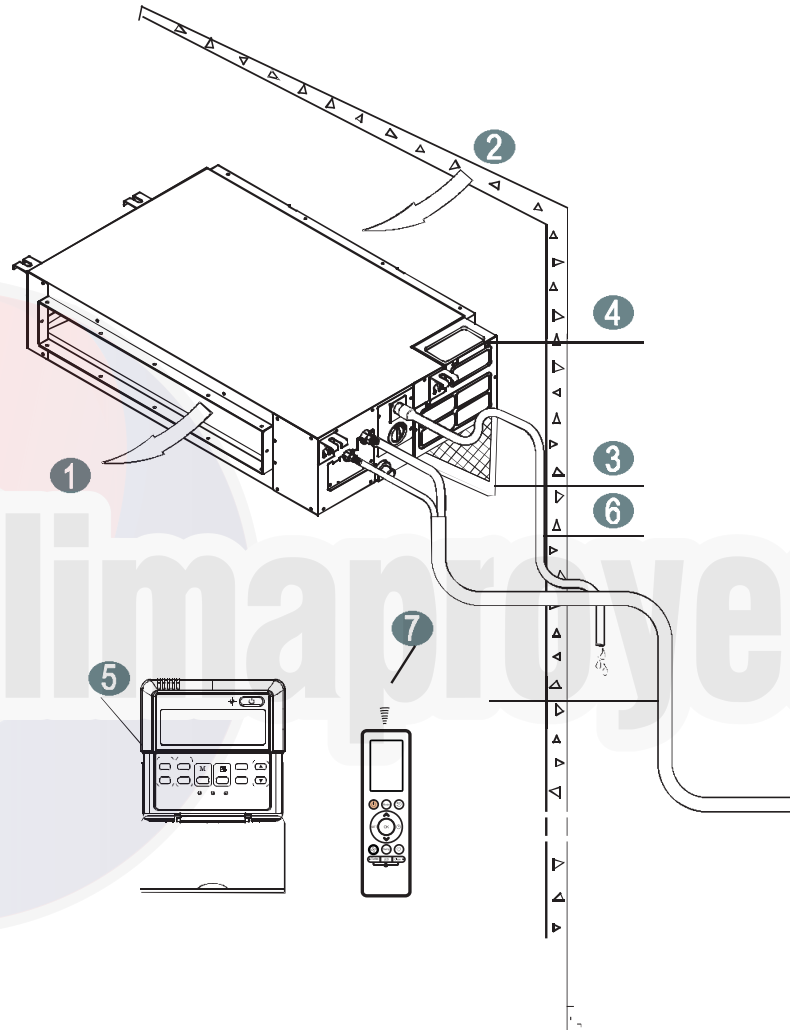

Fig. 1 — Indoor Unit

DISPLAY PANEL

Fig. 2 — IR Receiver Display Panel

FUNCTION BUTTONS

Before you begin using your new air conditioner, make sure to familiarize yourself with the remote control.

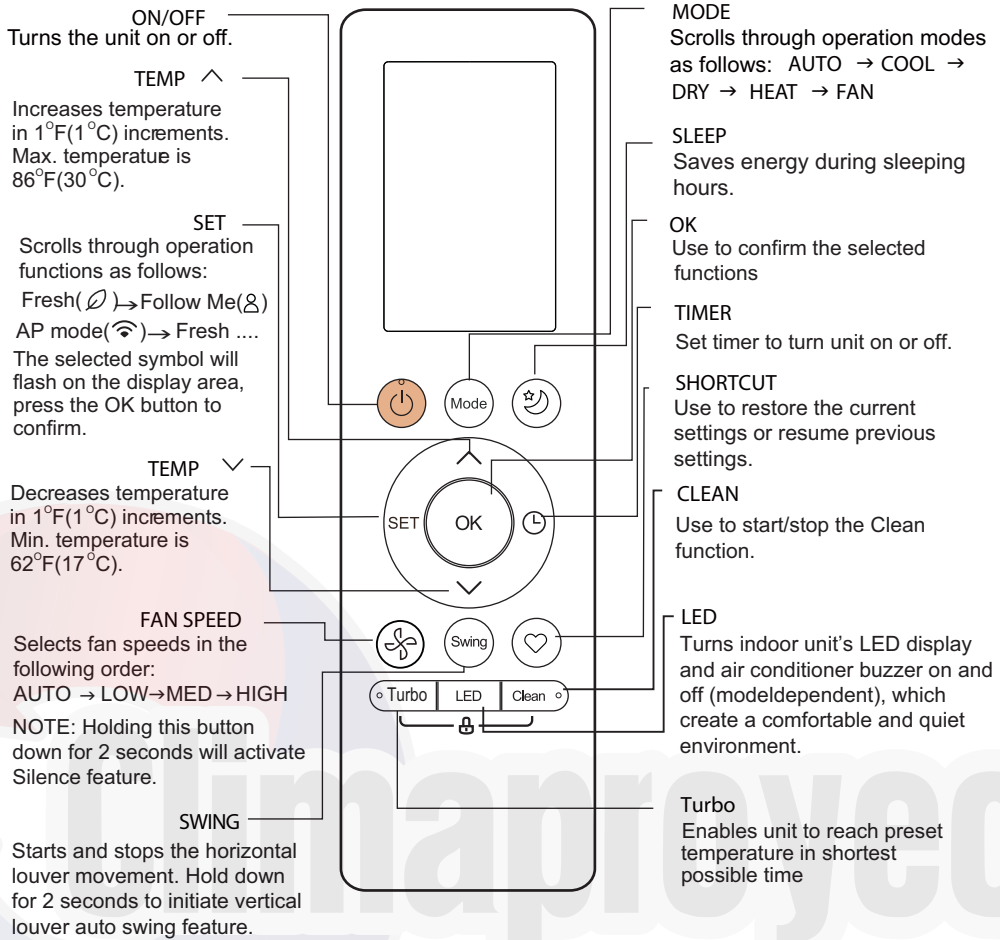

Fig. 3 — Remote Controller Function Buttons

NOTE: New remote controller Starting on production of week 41 year 2016 (serial number 4116V10001). For advanced functions refer to the indoor unit's service manual.

Remote LCD Screen Indicators

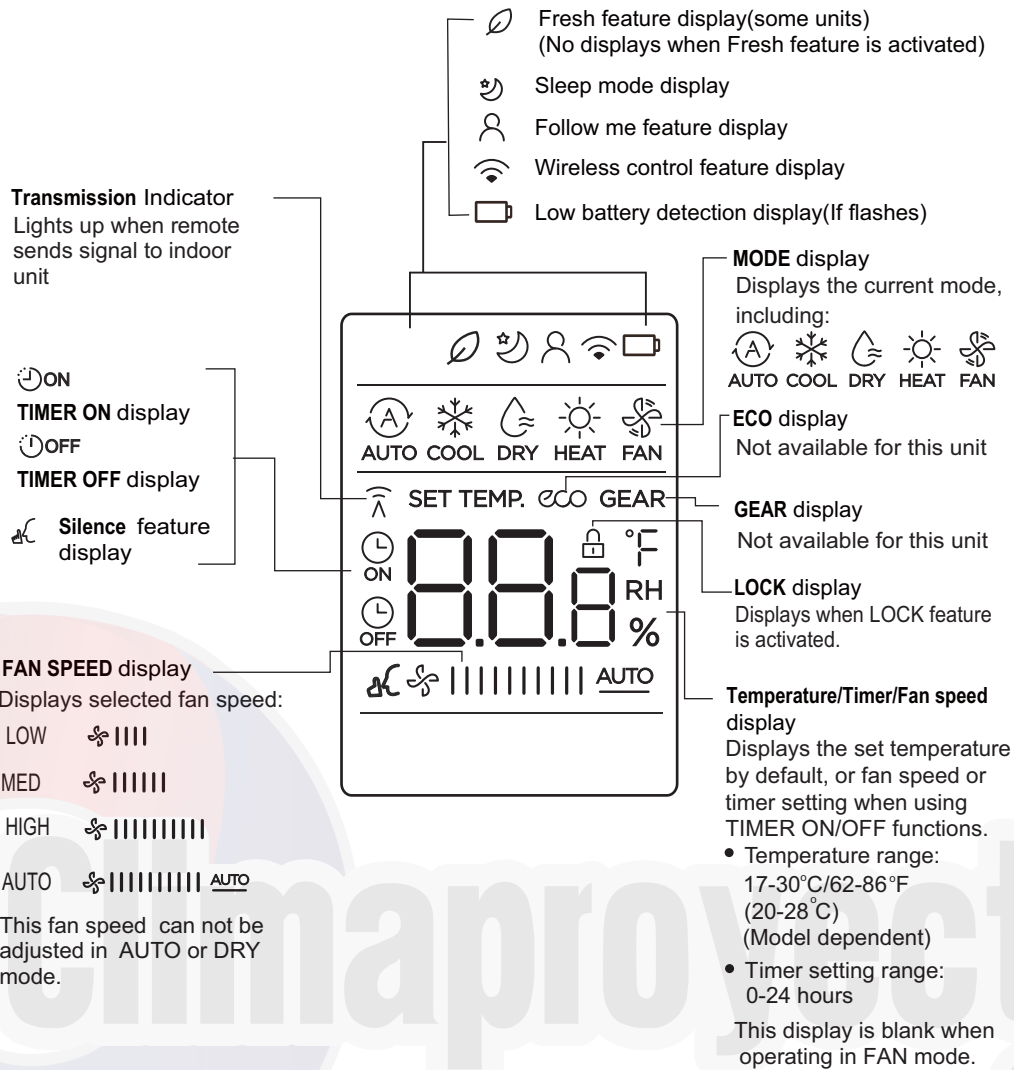

Fig. 4 — Wireless Remote Display

REMOTE CONTROL

CAUTION

EQUIPMENT DAMAGE HAZARD

Failure to follow this caution may result in equipment damage. Handle the control with care and avoid getting the control wet.

IMPORTANT: The remote control can operate the unit from a distance of up to 26 ft. (8 m) as long as there are no obstructions.

NOTE: If a wireless remote controller is used, relocate the IR Receiver within line of sight of the remote location using the 6 ft. cable included. The factory location of the IR receiver is inside the control box.

When the timer function is used, the remote control should be kept in the vicinity of the fan coil (within 26 ft. (8 m)).

The remote control can perform the following basic functions:

- Turn the system ON and OFF
- Select the operating mode
- Adjust room air temperature set point and fan speed
- Adjust right-left airflow direction

Refer to the “Remote LCD Screen Indicators” on page 5 for a detailed description of all the capabilities of the remote control.

Battery Installation

Two AAA 1.5v alkaline batteries (included) are required for remote control operation.

To install or replace batteries:

1. Slide the back cover off the control to open the battery compartment.
2. Insert the batteries. Follow the polarity markings inside the battery compartment.
3. Replace the battery compartment cover.

NOTES:

1. When replacing batteries, do not use old batteries or a different type battery. This may cause the remote control to malfunction.
2. If the remote is not going to be used for several weeks, remove the batteries. Otherwise, battery leakage may damage the remote control.
3. The average battery life under normal use is about 6 months.
4. Replace the batteries when there is no audible beep from the indoor unit or if the Transmission Indicator fails to light.
5. When batteries are removed, the remote control erases all programmed settings. The control must be reprogrammed after the insertion of new batteries.

Remote Control Operation - Quick Start

NOTE: When transmitting a command from the remote control to the unit, be sure to point the control toward the right side of the unit. The unit confirms receipt of a command by sounding an audible beep.

1. Turn the unit on by pushing **ON/OFF**.
NOTE: If there is a preference for °C rather than °F (default), press and hold ▲ and ▼ temperature set point buttons together for approximately 3 seconds.
2. Select the desired mode by pushing **MODE**.

Fig. 5 —Modes

3. Select the temperature set point by pointing the control toward the unit and pressing the increase/decrease temperature set point buttons until the desired temperature appears on screen.
4. Press **FAN** to select the desired fan speed.

NOTE: If the unit is operating in **DRY** or **AUTO** mode, the fan speed will be automatically set.

Manual Operation

If the remote control is lost, damaged, or the batteries are exhausted, the **MANUAL** button located on the IR Receiver can be used to run the unit.

When **MANUAL** is pressed once, the **AUTO** mode takes affect (heat or cool). When this button is pressed twice, the system enters the **TEST** mode and runs for 30 minutes in the **COOLING** mode (it will run in the **AUTO** mode afterward). When pressed three times, the system turns off.

Fig. 6 — IR Receiver Display Panel

The set conditions of manual operation are as follows:

- **Preset set point: 76°F (24°C)**
- **Fan speed: AUTO**

REMOTE CONTROL FUNCTIONS

Pressing ON/OFF

When the air conditioner is not in operation, the remote control displays the last set point and mode.

- **Press ON/OFF to start the unit.**
 - The unit starts in the last operating mode and set point. The ON/OFF indicator appears.
- **Press ON/OFF to stop the unit.**
 - All the indicator lights on the unit go out, and the remote control displays the set point and mode.

NOTE: If ON/OFF is pressed too soon after a stop, the compressor will not start for 3 to 4 minutes due to the inherent protection against frequent compressor cycling. The unit only emits an audible beep when the signals are received correctly.

Selecting an Operating Mode

Use **OPERATING MODE** to select one of the available modes.

Fig. 7 — Display

Setting the Room Temperature Set Point

Press the increase temperature set point ▲ and decrease ▼ buttons to raise or lower the temperature. The unit confirms the signal receipt with a beep and the value of the set temperature appears on the display and changes accordingly. The temperature can be set between 62°F (17°C) and 86°F (30°C) in increments of 1°F or 1°C.

NOTE: In the **COOLING** mode, if the temperature selected is higher than the room temperature, the unit will not start. The same applies for the **HEATING** mode if the selected temperature is lower than the room temperature.

Selecting the Fan Speed

Fig. 8 — Fan Speeds

1. Press **FAN** to select the fan speed.

NOTE: When the unit is on, the fan runs continuously in **COOLING** or **HEATING**. When in **HEATING**, there may be situations where the fan slows down or shuts off to prevent cold blow.

DIRECT

NOTE: The **DIRECT** feature is not available on this model.

SWING

NOTE: The **SWING** feature is not available on this model.

Timer Function

TIMER ON (to start the unit) and **TIMER OFF** (to stop the unit) can be used separately or together.

Timer ON only

This function allows the unit to start automatically at the set time. The **TIMER ON** can be set while the unit is on or off.

UNIT ON

- a. Press **TIMER ON** to initiate the auto-on time sequence. The set time is displayed in the remote control display. Every time **TIMER ON** is pressed, the time increases by 30 minutes, up to 10 h. It increases by 60 minutes, afterwards, until the time setting reaches 24 h.
- b. When **TIMER ON** is set, the unit's **TIMER** light illuminates. The unit continues to run at the set time.

UNIT OFF

- a. Set the timer described in the **UNIT ON** section.
- b. The unit starts at the set time.

Adjust the **TIMER ON** settings to 0.0 to cancel this option.

Timer OFF only

This function allows the unit to stop automatically at the set time. The timer can be set while the unit is on or while it is off.

UNIT ON

- a. Press **TIMER OFF** to initiate the **AUTO-OFF** time sequence. The set time appears on the remote control display. Everytime **TIMER OFF** is pressed, the time increases by 30 minutes, up to 10 h. It increases by 60 minutes, afterwards, until the time settings reach 24 h.
- b. When **TIMER OFF** is set, the timer light on the unit illuminates and the unit turns off automatically at the set time.

UNIT OFF

- a. Set the **TIMER OFF** as described in the **UNIT ON** section. The **TIMER** display on the unit illuminates and the unit remains off.
- b. Adjust the **TIMER ON** settings to 0.0 to cancel this option.

Timer ON and Timer OFF

Use both functions to program the unit to turn on and shut off at specified times.

UNIT OFF

- a. Set **TIMER ON** as previously described.
- b. Set **TIMER OFF** as previously described. The unit starts automatically at the set **TIME ON** and turns off at the set **TIME OFF**.

UNIT ON

- a. Set **TIME OFF** as previously described.
- b. Set **TIME ON** as previously described. The unit turns off automatically at the set **TIME OFF** and turns on at the set **TIME ON**.

Sleep Mode

SLEEP mode is used to conserve energy and can be used when the unit is in the **COOL**, **HEAT** or **AUTO** mode only.

Cool Mode

- a. Push the **SLEEP** button. After 1 hour the set point raises by 1.8°F (1°C). After another hour, the set point raises by another 1.8°F (1°C) and the fan runs in a low speed. The unit shuts off 5 hours after setting the **SLEEP** mode. The **SLEEP** mode cancels if either the “Mode”, “TEMP”, “Fan”, “Timer”, or “On/Off” buttons on the remote control is pressed.

Heat Mode

Same as **COOLING** mode however set points are lowered by 1.8°F (1°C).

Turbo Mode

Use the **TURBO** mode to cool or heat the room rapidly.

- a. Press **TURBO**. An audible “beep” is heard if the indoor unit supports this function. The fan runs on super high speed. The **TURBO** mode terminates automatically 20 minutes after pushing **TURBO**. It can be terminated immediately by selecting **TURBO** again. When the **TURBO** mode is terminated, the unit reverts to the original setting.

Self Clean Mode (Available only on sizes 9 to 24)

Press **Self Clean** to activate or deactivate the self-cleaning function. Under this function, the air conditioner automatically cleans and dries the evaporator. The cleaning cycle takes 30 minutes, after which the unit turns off automatically. Pressing **Self Clean** in the middle of the cycle cancels the operation and turn off the unit. This function can be activated only on **COOL** or **DRY** mode.

Follow Me Mode

Press **Follow Me** to activate or deactivate this function. Under this setting, the temperature that appears in the remote control is the actual temperature at its location. The remote control sends this signal to the air conditioner every 3 minutes. This function is not available for **DRY** and **FAN** modes.

Freeze Protection Mode

Press **FP** for approximately 2 seconds to activate or deactivate the freeze protection mode (heating set back). The indoor unit displays “FP”.

NOTE: This function is only available in the HEATING mode. Under this function, the unit operates at high fan speed and the coil temperature automatically sets to 46°F (8°C). This mode can also be deactivated by pressing the “On/Off”, “Sleep”, “Mode”, “Fan”, or either “TEMP” buttons.

Silence Mode

NOTE: The Silence Mode (SLC) feature is not available on this model.

LED Light

Press **LED** to turn the display light on and off.

Resetting the Remote Control

If the batteries in the remote control are removed, the current settings will cancel and the control returns to the initial settings and will be in **STANDBY** mode. Push **ON/OFF** to activate it.

Time Delay

If **ON/OFF** is pressed too soon after a stop, the compressor will not start for 3 to 4 minutes due to the inherent protection against frequent compressor cycling. The unit only emits an audible beep when the signals are received correctly.

Heating Features

If the unit is in the **HEATING** mode, there is a delay when the fan starts. The fan starts only after the coil is warmed up to prevent cold blow.

Auto Defrost Operation

In **HEATING** mode, if the outdoor coil is frosted, the indoor fan and outdoor fan turns off while the system removes the frost from the outdoor coil. The system automatically reverts to normal operation when frost is removed from the outdoor unit.

Auto Start

If the power fails while the unit is operating, the unit stores the operating condition, and the unit will start operation automatically under those conditions when the power is restored.

CLEANING, MAINTENANCE AND TROUBLESHOOTING

⚠ CAUTION

ELECTRICAL SHOCK HAZARD

Failure to follow this caution may result in personal injury or death. Always turn off power to the system before performing any cleaning or maintenance to the system. Turn off the outdoor disconnect switch located near outdoor unit. Be sure to disconnect the indoor unit if on a separate switch.

⚠ CAUTION

EQUIPMENT DAMAGE/OPERATION HAZARD

Failure to follow this caution may result in equipment damage or improper unit operation.

Operating the system with dirty air filters may damage the indoor unit and could cause reduced cooling performance, intermittent system operation, frost build-up on indoor coil or blown fuses.

Periodic Maintenance

Periodic maintenance is recommended to ensure proper operation of the unit. Recommended maintenance intervals may vary depending on the installation environment, e.g., dusty zones, etc. Refer to Table 1 on page 11.

⚠ CAUTION

CUT HAZARD

Failure to follow this caution may result in personal injury. The coil fins are very sharp. Use caution when cleaning. Always wear safety protection.

Cleaning the Coil

Clean the coil at the beginning of each cooling season, or when necessary. Use a vacuum cleaner or a long-bristle brush to avoid damage to the coil fins.

Cleaning the Air Filters

Remove and clean the air filters once a month.

NOTE: If air filters show signs of excessive wear or are torn, they must be replaced. Contact your local dealer for replacement filters.

1. Unscrew filters from the frame.
2. Pull filters down to remove.

Fig. 9 — Remove the filters

3. Vacuum the filters.

Fig. 10 — Vacuum the filters

4. Clean with warm water.

Fig. 11 — Clean filter with warm water

5. Shake the filter to remove excess water and dry thoroughly.
6. Replace the filter by sliding into rack until the filter snaps in place.
7. Close the front panel on the unit.

⚠ CAUTION

EQUIPMENT DAMAGE HAZARD

Failure to follow this caution may result in equipment damage. When cleaning the front panel, do not use water hotter than 105°F (40.6°C) and do not pour water onto the fan coil. Do not use abrasive or petroleum based cleaners as they may damage the front panel.

Preparing for Extended Shutdown Period

Clean the filters and reposition them in the unit. Operate the unit in **FAN ONLY** mode for 12 hours to dry all internal parts. Turn the main power supply off and remove batteries from the remote control.

System Operation Recommendations

The items outlined in the following list help to assure proper system operation:

- Replace both remote control batteries at the same time.
- Point the remote control toward the unit display panel when transmitting a command.
- Keep the doors and windows closed while unit is operating.
- Contact an authorized service representative if a problem arises that cannot be easily resolved.
- Do not perform cleaning or maintenance activities while the unit is on.
- Keep the display panel on the unit away from direct sunlight and heat as this may interfere with remote control transmissions.
- Do not block air intakes and outlets on the indoor or outdoor units.

Energy Saving Recommendations

The following recommendations add greater efficiency to the ductless system:

- Select a comfortable thermostat setting and leave it at chosen setting. Avoid continually raising and lowering the setting.
- Keep the filter clean. Frequent cleaning may be necessary depending on indoor air quality.
- Use drapes, curtains or shades to keep direct sunlight from heating the room on very hot days.
- Limit the unit's run time by using the **TIMER** function.
- Do not obstruct the air intake on the front panel.
- Turn on the air conditioning unit before the indoor air becomes too uncomfortable.

TROUBLESHOOTING

Refer to Table 2 before contacting your local dealer.

Table 1 — Periodic Maintenance

INDOOR UNIT	EVERY MONTH	EVERY 6 MONTHS	EVERY YEAR
Clean Air Filter*	•		•
Change Remote Control Batteries			
OUTDOOR UNIT	EVERY MONTH	EVERY 6 MONTHS	EVERY YEAR
Clean Outdoor Coil from Outside		•	
Clean Outdoor Coil from Inside†			•
Blow Air Over Electric Parts†			•
Check Electric Connection Tightening†			•
Clean Fan Wheel†			•
Check Fan Tightening†			•
Clean Drain Pans†			•

* Increase frequency in dusty zones.

† Maintenance to be carried out by qualified service personnel. Refer to the Installation Manual

Table 2 — Troubleshooting

PROBLEM	POSSIBLE CAUSE	SOLUTION
Unit/System Does Not Work	<ul style="list-style-type: none"> The circuit breaker has tripped or a fuse has blown. Power failure Diagnostic lights illuminate.* Voltage is too low. 	<ul style="list-style-type: none"> Reset the circuit breaker or replace the fuse with the specified replacement fuse. Call your service representative. Call your service representative.
Cooling is Not Working Properly	<ul style="list-style-type: none"> The filter is blocked by dust. Temperature is not set properly. A window or door is open. The outdoor unit is obstructed. The fan speed is too low. The operation mode is in FAN instead of COOL. 	<ul style="list-style-type: none"> Clean the air filter. Check the temperature and reset if necessary. Close the window or door. Remove the obstruction. Change the fan speed selection. Change the operating mode to COOL or reset the unit.
Heating is Not Working Properly	<ul style="list-style-type: none"> The filter is blocked with dust. Temperature is set too low. A window or door is open. The outdoor unit is obstructed. 	<ul style="list-style-type: none"> Clean the air filter. Check the temperature and reset if necessary. Close the window or door. Remove the obstruction.
Unit Stops During Operation	<ul style="list-style-type: none"> The OFF timer is not operating correctly. Diagnostic lights illuminate.* 	<ul style="list-style-type: none"> Restart the operating mode. Call your service representative.

* Diagnostic lights are a combination of lights that will illuminate in the display area on the unit. They are a combination of the lights you see during normal operation.
